Compliance

1.Are Under Armour Code of Conduct posters and FLA (Fair Labor Organization) posted, in each of the worker's and manager's primary

Full Compliance

languages, and reviewed with employees?

IMAGE Image 1

IMAGE Image 2

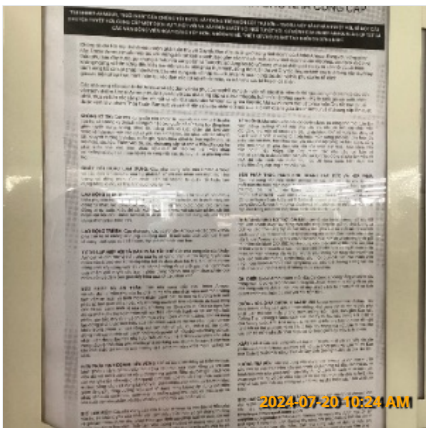

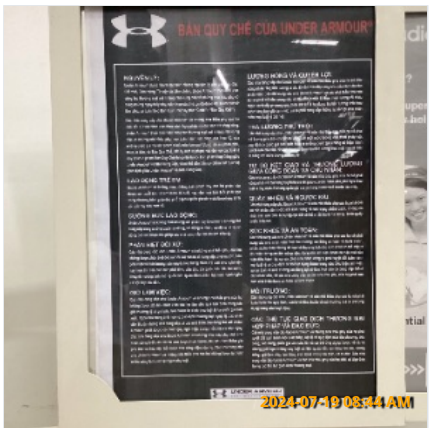

IMAGE Image 3

Compliance

2. Are employee ID's clearly visible?

Full Compliance

IMAGE Image 1

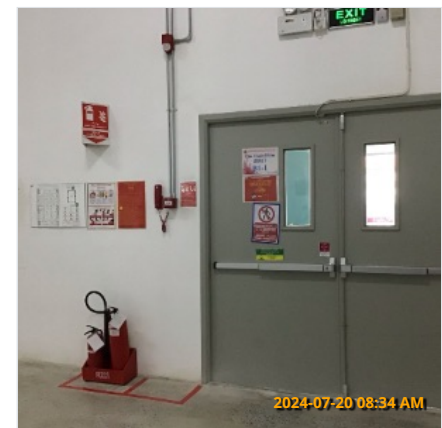

Compliance

3. During the assessment were any of the emergency exits blocked and/or non-functional?

Full Compliance

IMAGE Image 1

Compliance

4. Were fire extinguishers present during the walk and were maintenance tags up to date?

Full Compliance

IMAGE Image 1

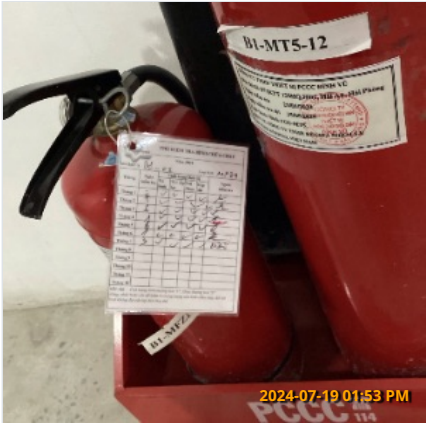

IMAGE Image 2

Compliance

5. Was there clearly identified and unblocked access to firefighting equipment? Is the equipment functional?

Full Compliance

IMAGE Image 1

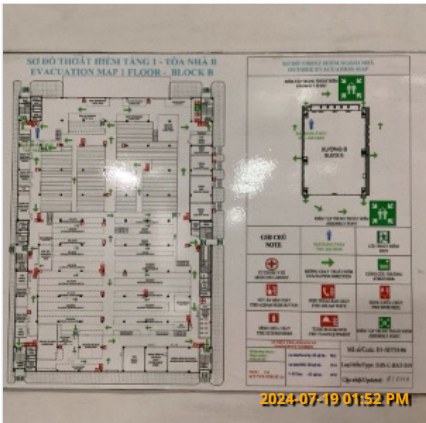

Compliance

6. Are there clearly posted and accurate exit maps posted throughout the factory?

Full Compliance

IMAGE Image 1

Compliance

7. Are the exits clearly marked with proper aisle width/clearance/unblocked?

Full Compliance

IMAGE Image 1

Compliance

8. Are there clearly marked and easily accessed external emergency gathering points for all employees?

Full Compliance

IMAGE Image 1

Compliance

9. Are the employee bathrooms cleaned on a regular basis with record keeping, maintenance plan, acceptable equipment and proper disposals?

Full Compliance

IMAGE Image 1

Compliance

10. Is there readily available drinking water in all departments with acceptable conditions/place over no-spill container?

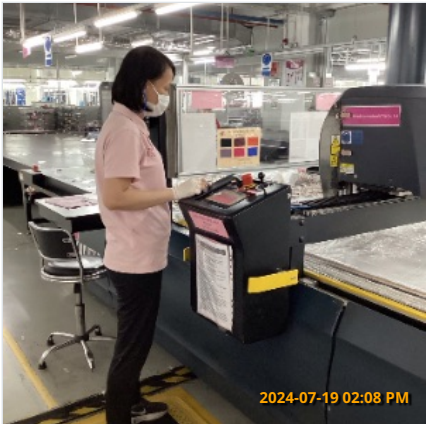

Full Compliance

IMAGE Image 1

Compliance	
11. Are rubber “fatigue” mats available for employees that are required to stand at working station level?	Full Compliance

IMAGE Image 1

Compliance	
12. Are workers provided with ergonomic adjustable (on height) and with back support chairs	Full Compliance

IMAGE Image 1

Compliance	
13. Are PPE, eye, ear, hand, including machines guards, finger protection and respiratory signs posted where necessary and are workers using mandatory PPE on applicable areas as needed?	Full Compliance

IMAGE Image 1

IMAGE Image 2

Compliance	
14. Are hazardous materials and any Chemicals, clearly marked with proper storage?	Full Compliance

IMAGE Image 1

Compliance	
15. Are first aid kits present in all departments with non-expired designated supplies?	Full Compliance

IMAGE Image 1

Compliance	
16. Is there an on-site medical clinic with a certified nurse or doctor?	Full Compliance

IMAGE Image 1

Compliance

17. Is there any SOP about preventive pest control in factory including the evidence of internal/external pest activity that could compromise product safety and quality? (Rodent droppings)	Full Compliance
--	-----------------

Compliance

18. Did the tour avoid any departments or buildings?	Full Compliance
--	-----------------

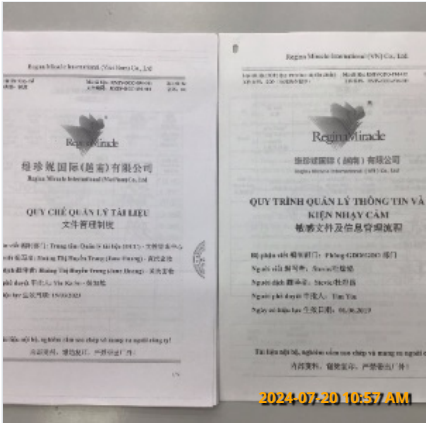

Compliance

19. Was any verbal, physical, abuse, harassment or discrimination witnessed during the PTH (Protect This House) Assessment? If yes, please describe.	Full Compliance
--	-----------------

Intellectual Property and Brand Protection

20. Does the company have a policy of recordkeeping and restrictions on the use of intellectual property including but not limited to VID Labels?	Full Compliance
---	-----------------

IMAGE Image 1

Intellectual Property and Brand Protection

21. Is there a video camera system installed and monitored properly? How records/reports being kept/tracked?	Full Compliance
--	-----------------

IMAGE Image 1

Intellectual Property and Brand Protection

22. Is there a documented, visible standard posted regarding the restriction of cell phones and photographing intellectual property?

Full Compliance

IMAGE Image 1

IMAGE Image 2

Intellectual Property and Brand Protection

23. Does the factory check personal belongings at the end of each shift, upon exiting the facility?

Full Compliance

IMAGE Image 1

Intellectual Property and Brand Protection

24. Is there a locked room housing all samples and strike off? Are the samples segregated/separate from other brands?

Full Compliance

IMAGE Image 1

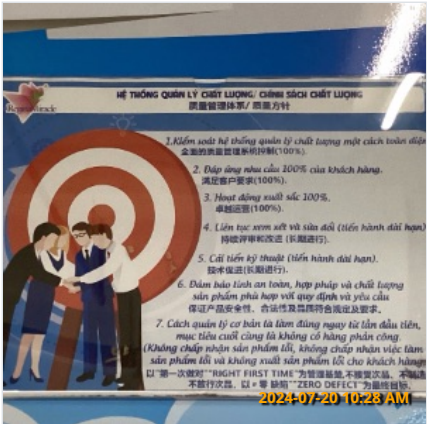

MANAGEMENT
100.00 %

Commitment

25. Does top management show its commitment to the development, implementation and Continuous Improvement of the QMS (Quality Management System)?

Full Compliance

IMAGE Image 1

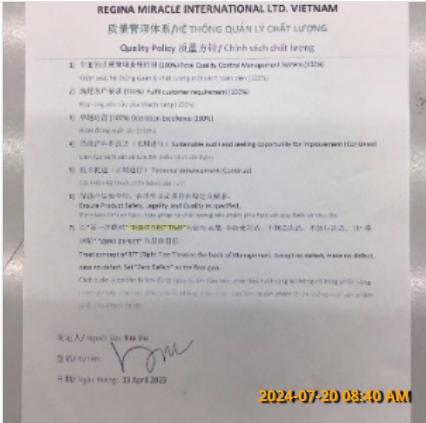

Commitment

26. Has the concept of RFT (Right First Time) (Accept no defect, make no defect, pass no defect) been adopted, supported, communicated, and implemented by management?

Full Compliance

IMAGE Image 1

Commitment

27. Does the organization determine and provide all necessary resources and training to implement a world class Quality Management System?

Full Compliance

IMAGE Commitment 1

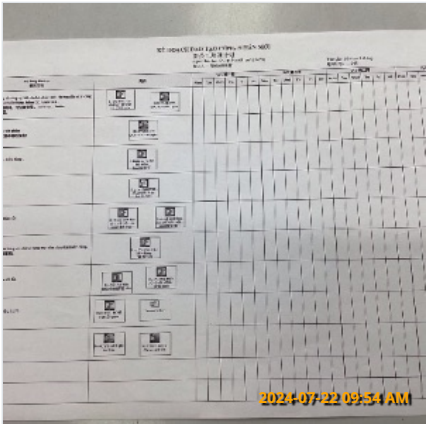

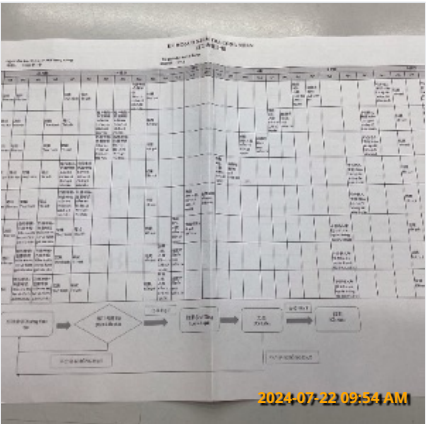

IMAGE Image 2

Commitment

28. Do managers and staff members answer questions without hesitation or conferring with another staff member? Are the answers logical and to the point?

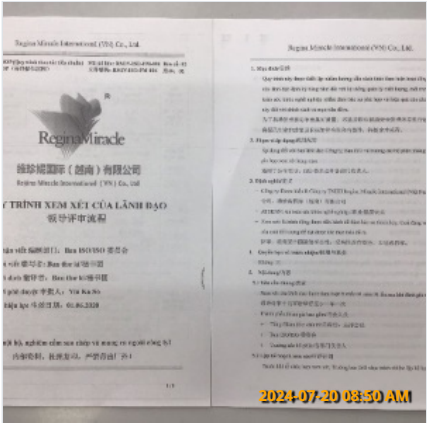

N/A

Commitment

29. Does the company has any policy to evaluate management leadership for their accountability on accomplish company mission, vision and quality policy? How often?

Full Compliance

IMAGE Image 1

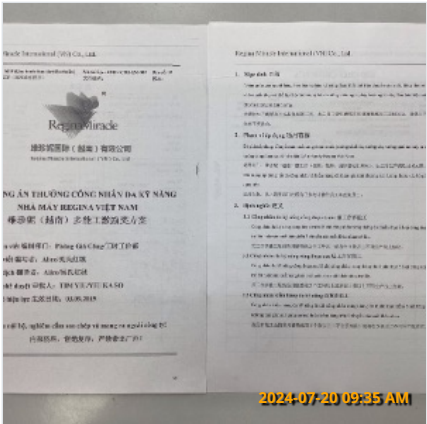

Commitment

30. Is there a policy to cover the absence of employees at any production stages? (I.e. - 25 sewing operators don't show up to work)

Full Compliance

IMAGE Image 1

Commitment

31. Is there an appropriate ratio of CFA (Certified Factory Auditors) to Production volume? Are the Certificates posted on work station?

Full Compliance

IMAGE Image 1

Commitment

32. Do all machines have accessible and updated service and preventative maintenance records? (Cutting Machines, Transfer, Sewing, Screen Printing, etc)

Full Compliance

IMAGE Image 1

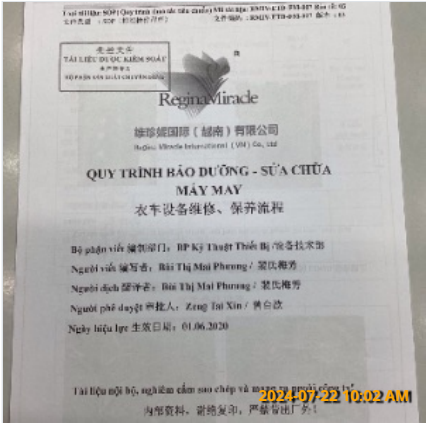

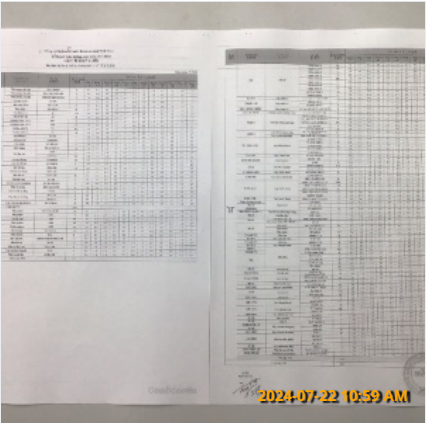

IMAGE Image 2

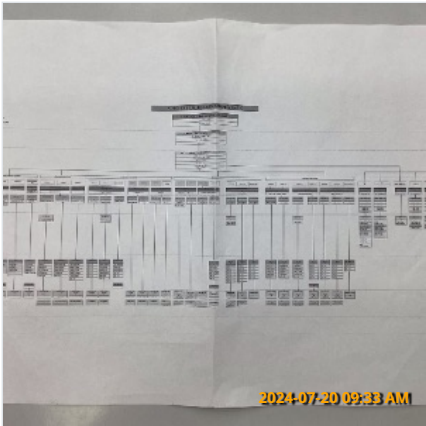

Quality Management System (QMS)

33. Is there a quality department clearly identified and QC/QA team dedicated to Under Armour?

Full Compliance

IMAGE Quality Management System (QMS) 1

Quality Management System (QMS)

34. Does the Quality Manager report directly to the Factory Manager/Top Managment? Provide Organization Chart.

Full Compliance

IMAGE Image 1

Quality Management System (QMS)

35. Does the factory have a Quality Manual and SOP's that supports its QMS (Quality Management System)?

Full Compliance

IMAGE Image 1

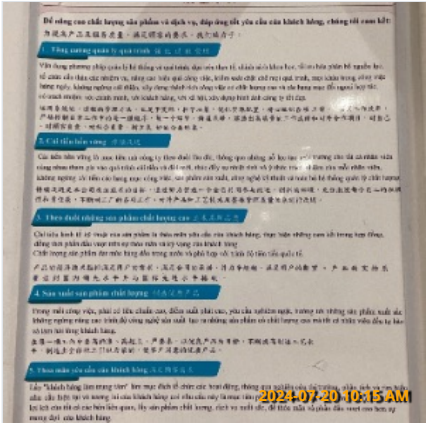

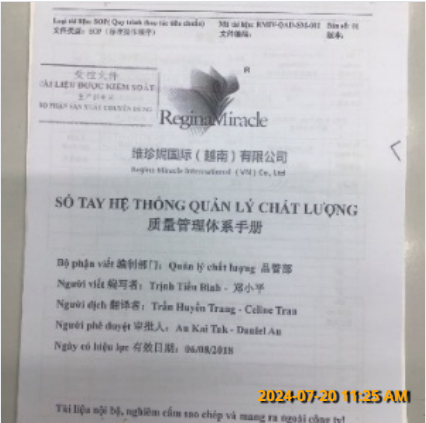

IMAGE Image 2

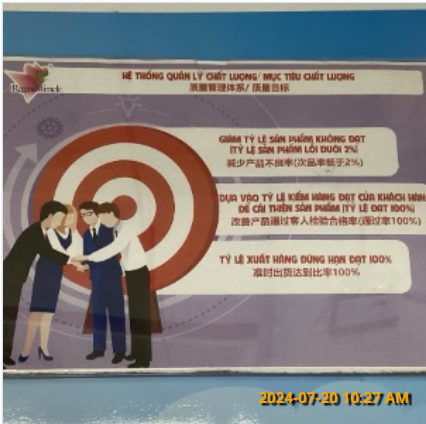

Quality Management System (QMS)

36. Is the QMS (Quality Management System) established and documented with visible Quality Goals? (Responsibility and rules included?)

Full Compliance

IMAGE Image 1

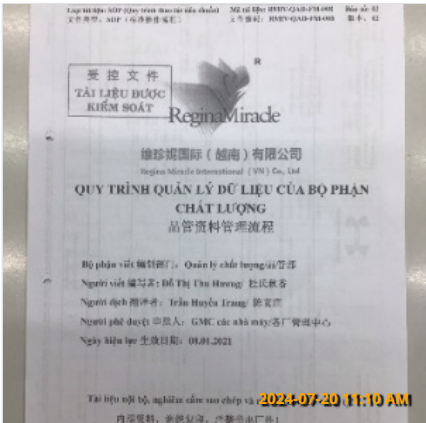

Quality Management System (QMS)

37. Is there a Documentation Control and Distribution Process ensuring that correct Manuals, Appendixes, latest issue of Common Thread, SOP latest version, available and being implemented?

Full Compliance

IMAGE Image 1

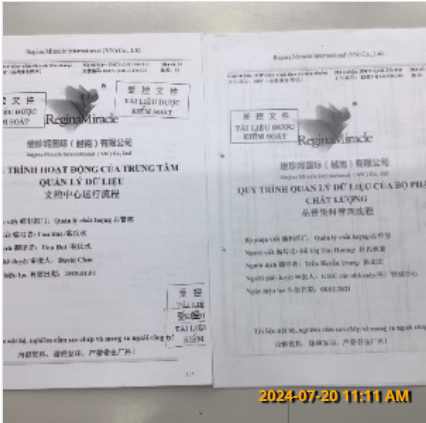

Quality Management System (QMS)

38. Is there a procedure for identification, gathering, storage, protection, and retention of all quality records in all processes?

Full Compliance

IMAGE Image 1

Quality Management System (QMS)

39. Have Quality goals and metrics been established and communicated in all areas and departments? Is there a daily, weekly, or monthly meeting with senior and middle management to review?

Full Compliance

IMAGE Image 1

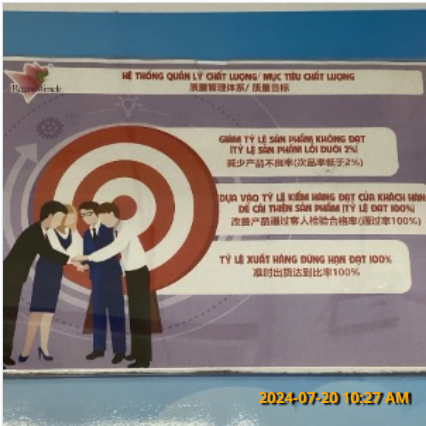

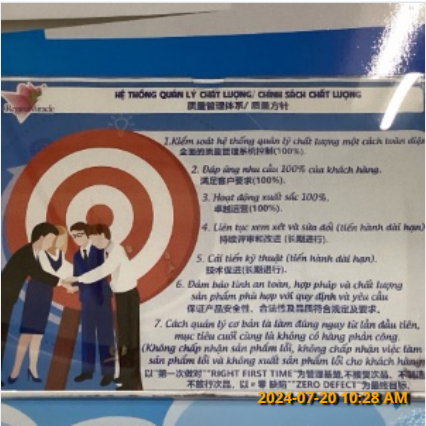

IMAGE Image 2

Quality Management System (QMS)

40. Does top management review, analyzed quantitative and qualitative metrics results within middle management to improve internal quality system?

Full Compliance

IMAGE Image 1

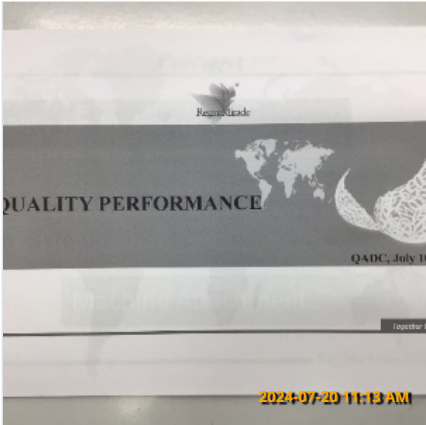

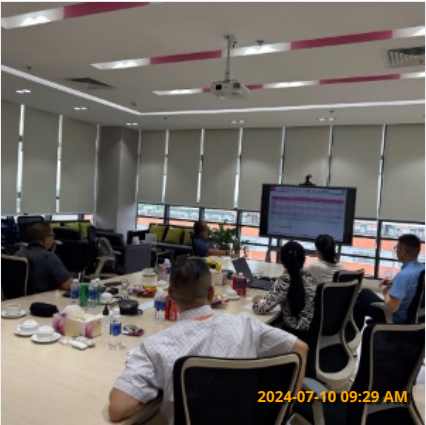

IMAGE Image 2

Quality Management System (QMS)

41. Is there an efficient system for selection and qualification of subcontracted processes and products are defined in the scope of the QMS?

N/A

Manufacturing Excellence

42. Are middle and upper management supporting and implementing Continuous Improvement tools such as 5S in all areas and common spaces with Visual Management? Are training records available and up to date?

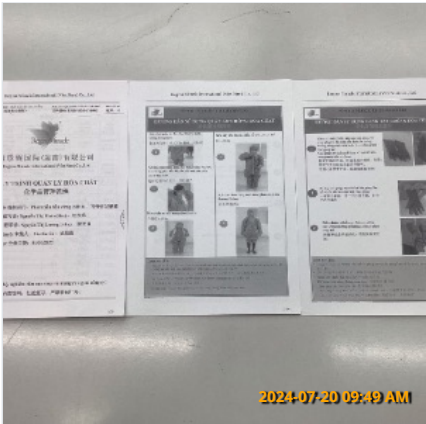

Full Compliance

Manufacturing Excellence

43. Is there a standardized, visual, FIFO (First-In-First-Out) tracking system established in all applicable areas and processes ? (Ex. VMI, Warehouse, Chemical storage, etc.)

Full Compliance

IMAGE Image 1

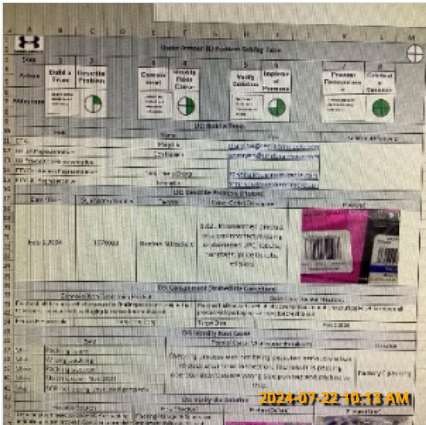

Manufacturing Excellence

44. Is there a standardized problem solving tool being taught and implemented across all areas of the campus/factory? (8D, PDCA or any other tool?)

Full Compliance

IMAGE Image 1

Manufacturing Excellence

45. Is the company actively pursuing and investing in innovation? (automation, RFID or any other?)

Full Compliance

IMAGE Image 1

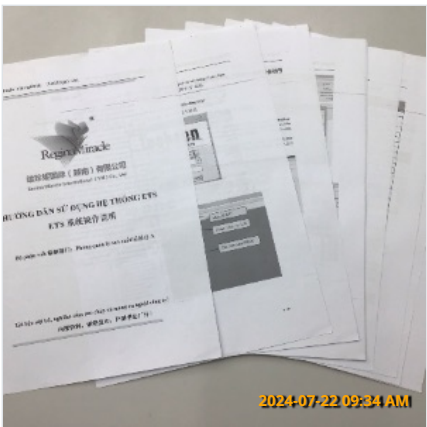

Manufacturing Excellence

46. Are there standardized processes to track WIP, raw materials, and production batches during and between all production stages; including Pivot 88 Final inspection process?

Full Compliance

IMAGE Manufacturing Excellence 1

Manufacturing Excellence

47. How are capacity limitations evaluated and communicated back to UA? Are reachable to confirmed capacity?

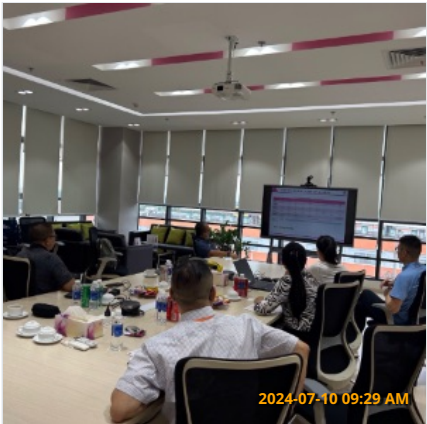

Full Compliance

Manufacturing Excellence

48. Are there meetings/procedures to analyze metric data provided through Pivot 88? Are these reviewed and being posted?

Full Compliance

IMAGE Image 1

Manufacturing Excellence

49. Are quality indicators (average % of defects, B-Grades, rework) published regularly (daily, weekly, monthly, by season), posted, reviewed and improved upon?

Full Compliance

IMAGE Manufacturing Excellence 1

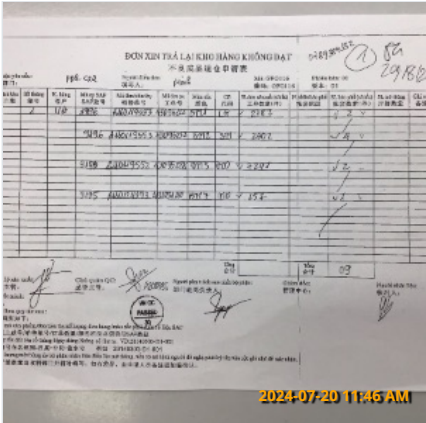

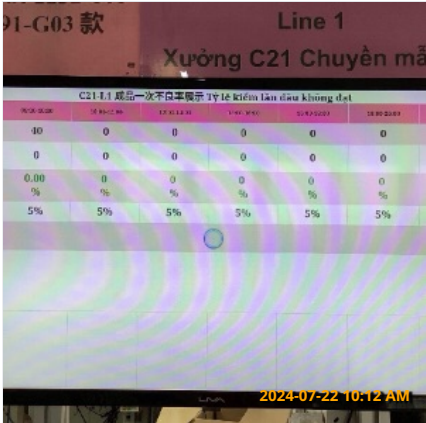

IMAGE Image 2

Manufacturing Excellence

50. Does the organization provides any incentive to the production employees based on quality and production targets?

Full Compliance

IMAGE Image 1

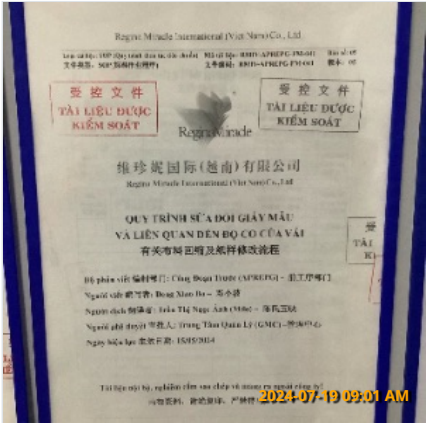

PRODUCTION
85.07 %

Pattern Department

51. Are different patterns made when shrinkage report shows rolls > 2% variation?

Full Compliance

IMAGE Image 1

Pattern Department

52. Is there a documented, standardized process for creating a measurement chart before wash for each pattern if applicable?

N/A

Pattern Department

53 .Are development/proto patterns saved and identified in different folders other than bulk approved patterns?

N/A

Pattern Department

54. Are there daily records for marker printer calibration and maintenance?

Full Compliance

IMAGE Image 1

IMAGE Image 2

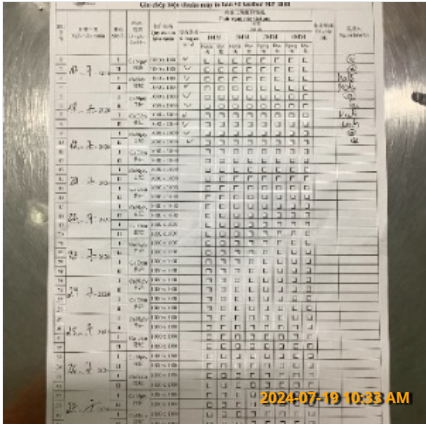

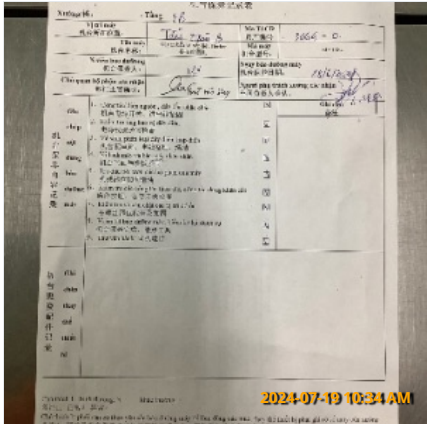

IMAGE Image 3

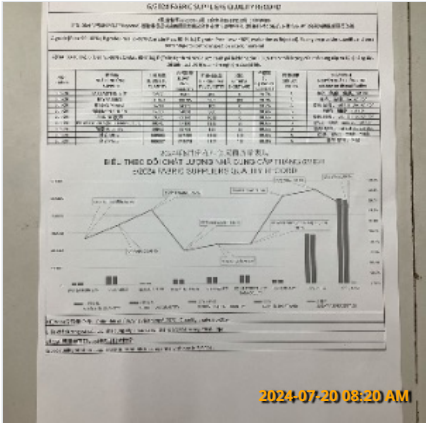

Fabric Warehouse

55. Are there visual Quality Metrics with easy access for supplier summary quality metrics?

Full Compliance

IMAGE Image 1

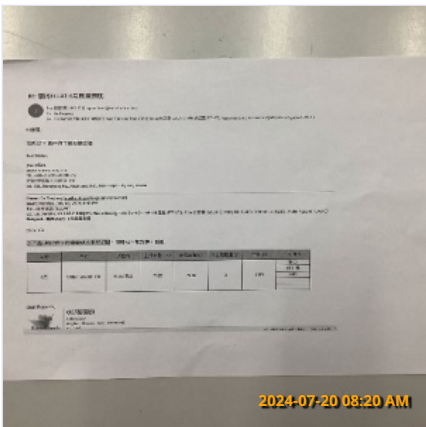

Fabric Warehouse

56. There is a process for sharing Quality and OTD metrics, including top 5 quality issues, with fabric mills. How Often?

Full Compliance

IMAGE Image 1

Fabric Warehouse

57. Fabric inspection is conducted on a proper, calibrated frame.

Compliant on Most Items

7s

IMAGE Fabric Warehouse 1

Fabric Warehouse

58. At least 10% of each dye lot on the packing list is inspected using a 4 point system.

Full Compliance

IMAGE Image 1

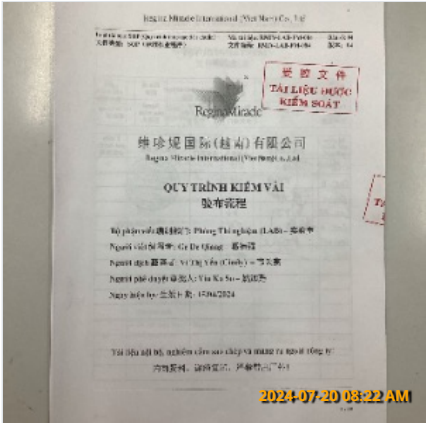

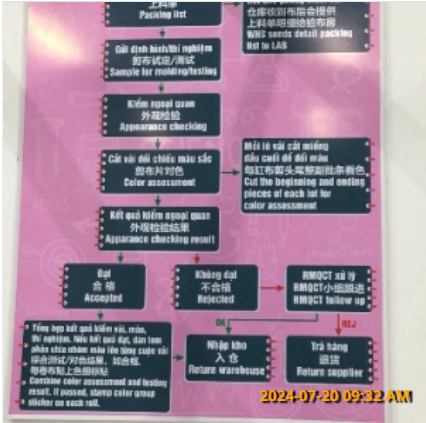

IMAGE Image 2

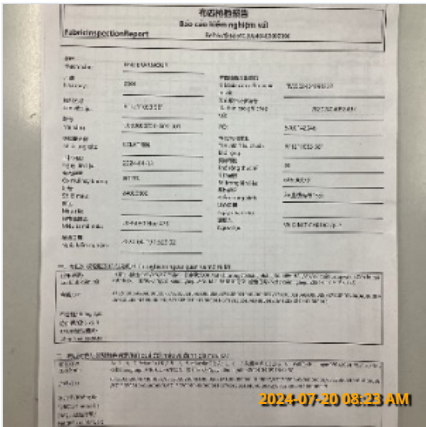

Fabric Warehouse

59. Inspection reports capture all defect points per 100 linear yards.

Full Compliance

IMAGE Image 1

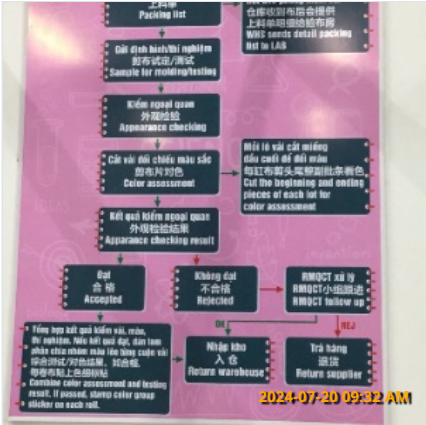

Fabric Warehouse

60. Is there a standardized process for identification, separation, segregation, recording and secure location for or all non-conforming fabrics? How long fabric is being kept and which is the final disposition?

Full Compliance

IMAGE Image 1

Fabric Warehouse

61. There is a standardized process to check for shade variation in the same roll using Left, Center, Right, Start, Middle, End color continuity cards.

Full Compliance

IMAGE Image 1

IMAGE Image 2

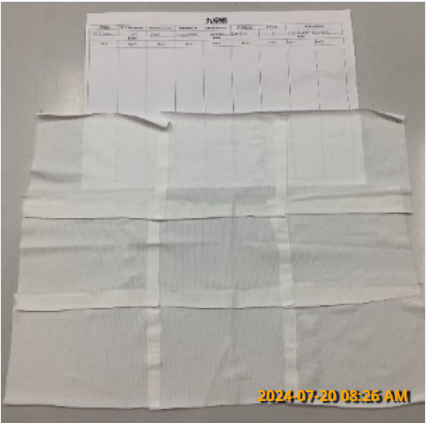

IMAGE Image 3

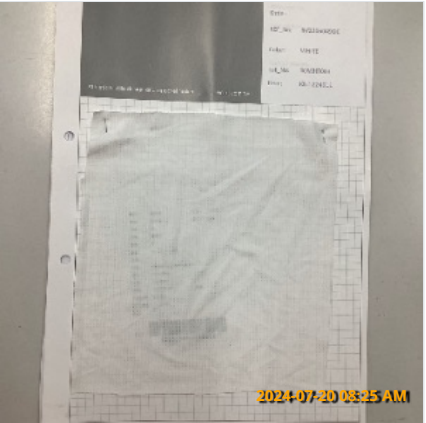

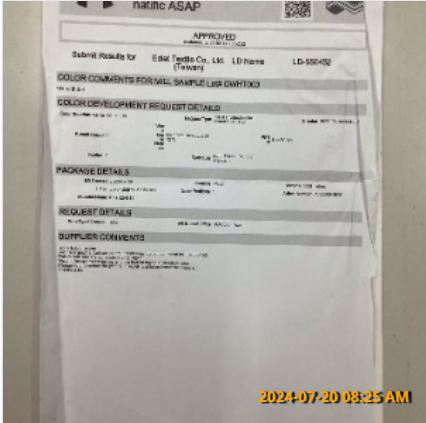

IMAGE Image 4

Fabric Warehouse

62. Under Armour color standards, Material Hanger and color approved swatches are signed, dated, confirmed and properly protected?

Full Compliance

IMAGE Image 1

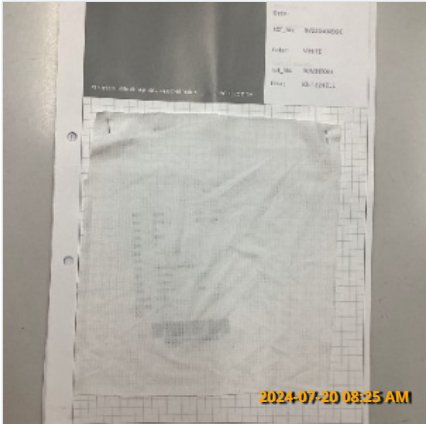

IMAGE Image 2

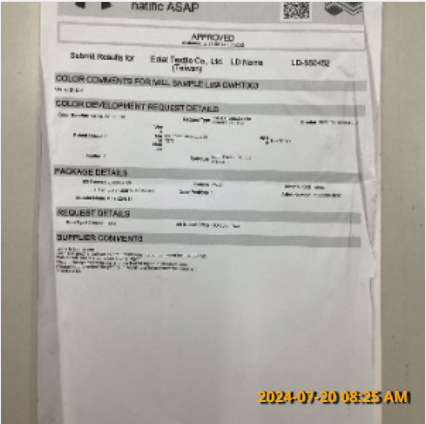

IMAGE Image 3

Fabric Warehouse

63. Color continuity cards are maintained and reviewed against the standard in an approved X-Rite or MacBeth light box with D65 primary light source, U35 secondary light source and UV.

Full Compliance

IMAGE Image 1

Fabric Warehouse

64. The light box is in a dark room with no outside light source. Recommend painting the room's walls as close as possible to Munsel N7 gray

Full Compliance

IMAGE Image 1

IMAGE Image 2

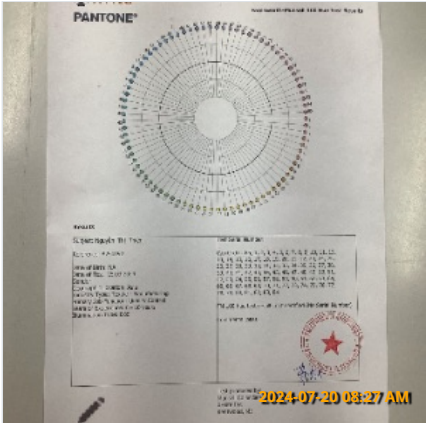

Fabric Warehouse

65. Available Munsell or Farnsworth hue testing is performed by approved employees to use light box with yearly testing and record keeping

Full Compliance

IMAGE Image 1

Fabric Warehouse

66. Are grey scale cards signed and issued within 12 months with date stamp?

Full Compliance

IMAGE Image 1

Fabric Warehouse

67. Fabric supplier QA inspection report, 3rd Party or Certified Lab Test reports and Cotton/Viscose Compliance Documents are received with each lot of fabric?

Full Compliance

IMAGE Image 1

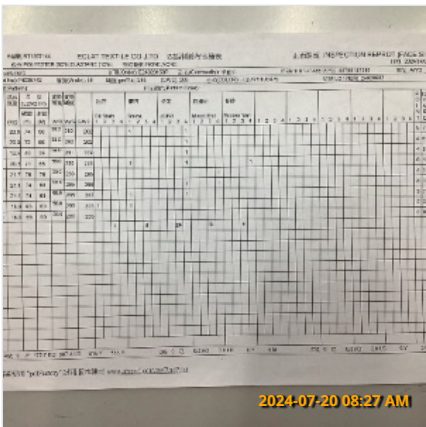

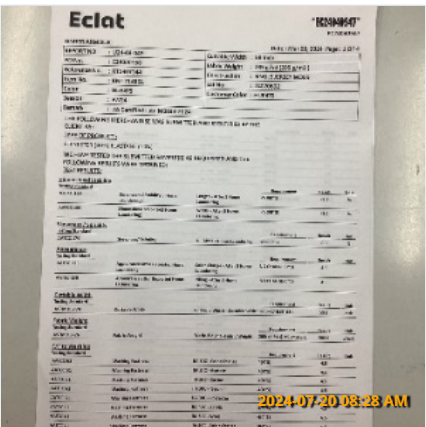

IMAGE Image 2

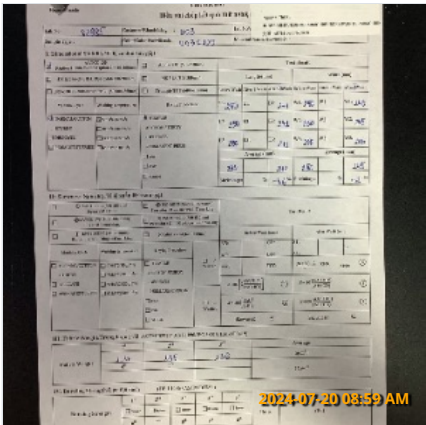

Fabric Warehouse

68. Fabric Shrinkage tests are conducted and recorded.

Full Compliance

IMAGE Image 1

Fabric Warehouse

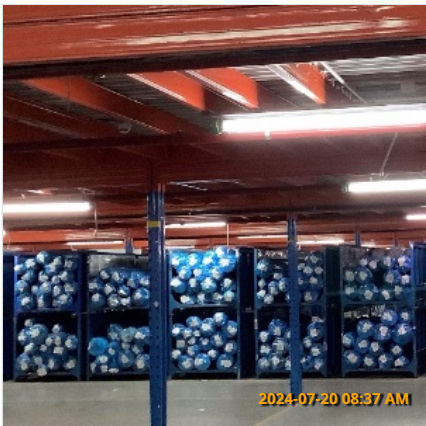

69. Is marker grouping done when shrinkage of >2% difference is detected?
Are 100% of the rolls checked ? Provide records

Full Compliance

Fabric Warehouse

70. Are all rolls stored on racks, properly handled , covered for protection, away from sunlight with weight and height delimitation to assure work safety and compliance?	Full Compliance
--	-----------------

IMAGE Image 1

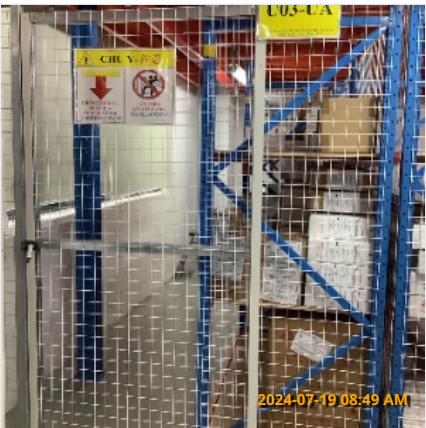

Trims Warehouse	
71. Are trims warehouses secured with controlled access.	Full Compliance

IMAGE Image 1

IMAGE Image 2

Trims Warehouse	
72. There are 3rd Party or Certified Lab Test reports and Cotton/Viscose Compliance Documents if applicable, for each trim received from the supplier?	More Than One Area Out of Compliance

Missing the 3rd party test report

Trims Warehouse	
73. Trim cards are available including QA validation, signed and dated, at what level? (Style, Code, Supplier, Trim Type, etc.)	Compliant on Most Items

the chop not cover label

IMAGE Image 1

Trims Warehouse

74. Standardized trim cards are created, validated, signed and dated for the production floor

More Than One Area Out of Compliance

Trim card not available

Trims Warehouse

75. All incoming trims are inspected under proper lighting with an AQL of 1.5 and standardized record keeping.

Full Compliance

IMAGE Image 1

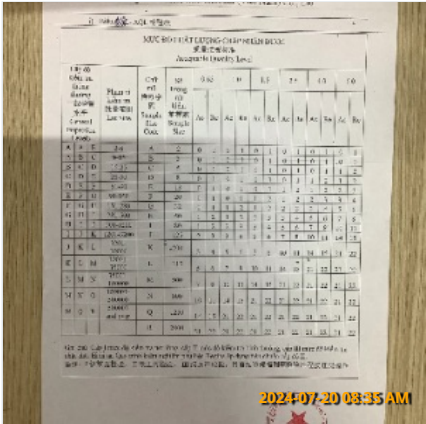

IMAGE Image 2

Trims Warehouse

76. Are pull tests conducted on youth trims with standardized record keeping and according to requirements? (buttons, snaps, etc.)

N/A

Trims Warehouse

77. Is there a standardized process for identification, separation, segregation, secure location and record keeping for all non-conforming/obsolete trims? Are those report and destroyed on monthly basis? How are left overs, obsoleted, etc. Addressed?

Full Compliance

IMAGE Image 1

Trims Warehouse

78. Heat seals and seam sealing tapes are stored in a temperature controlled environment with temperature and humidity standards posted with record keeping.

Full Compliance

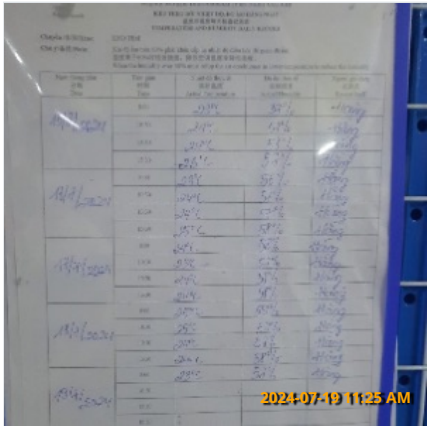

IMAGE Trims Warehouse 1

IMAGE Image 2

IMAGE Image 3

Trims Warehouse

79. All trims are covered and protected.

Full Compliance

IMAGE Image 1

Trims Warehouse

80. All VID (Vendor Identification labels) are in a secured space with restricted access

Full Compliance

IMAGE Image 1

Trims Warehouse

81. There is an established Kanban system to pull only the required amount of VID to the production floor. How are left overs addressed?

Compliant on Most Items

System only

Pre-Production

82. Is there a standardized Pre-Production Meeting on all new styles with key personal and pre-production sample documentation and meeting records? Who?

Full Compliance

IMAGE Image 1

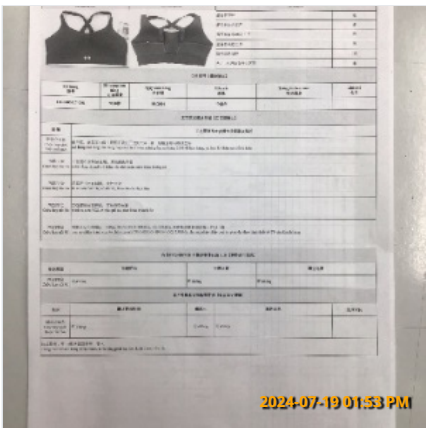

IMAGE Image 2

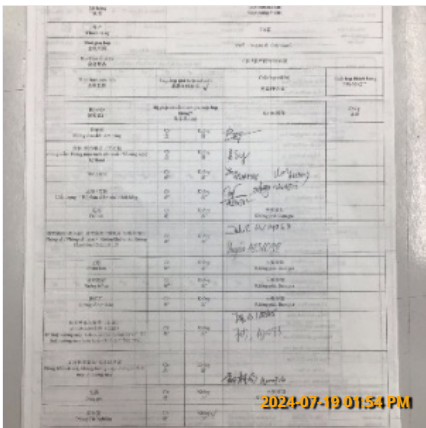

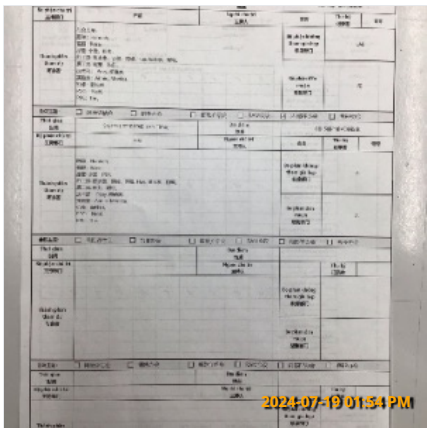

IMAGE Image 3

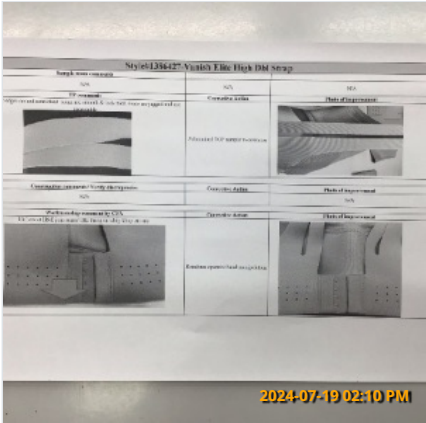

Pre-Production

83. Are pre-production samples produced for each new style which is reviewed against the customer's style KIT , according to UA Quality and Product Standards?

Full Compliance

IMAGE Image 1

Pre-Production

84. Are pre-production garments produced in the same facility as bulk production?

Full Compliance

Pre-Production

85. Is there a standardized process ensuring changes in design, carry over styles and during development process to verified, approved, communicated and carried out prior to bulk production? Are pilot and size set runs for new styles and records keeping?

Full Compliance

IMAGE Image 1

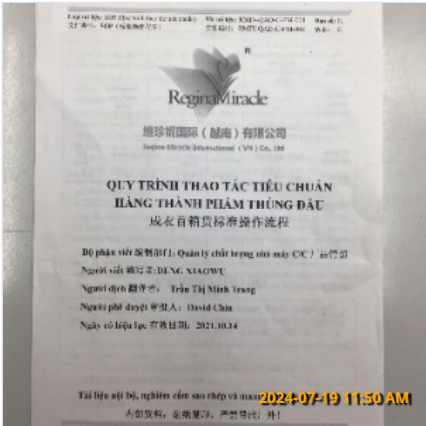

IMAGE Image 2

Pre-Production

86. Are pre-production or confirmation samples stored in conditions appropriate to maintain product integrity including all appropriate information, tags, meeting notes/forms?

Compliant on Most Items

Spreading and Cutting	
87. Are all safety procedure in place including PPE (Personal Protective Equipment)?	More Than One Area Out of Compliance

Not use PPS

IMAGE Spreading and Cutting 1

Spreading and Cutting	
88. Are fabrics relaxed according to fabric type and suppliers recommendations? How is this process done?	Full Compliance

IMAGE Image 1

Spreading and Cutting	
89. Is the relaxation date, start, stop time clearly indicated and located near	Full Compliance

each roll? How is this done and validated?

IMAGE Image 1

IMAGE Image 2

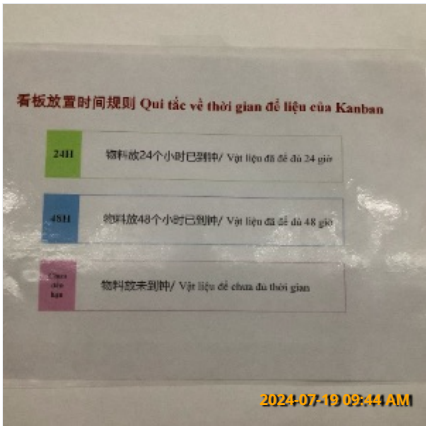

IMAGE Image 3

Spreading and Cutting

90. Are relaxation carts/shelves free of dust, no sharp edges, covered, and properly stacked not jeopardizing the relaxation processes?

More Than One Area Out of Compliance

the shelves have shape edges.

IMAGE Image 1

IMAGE Image 2

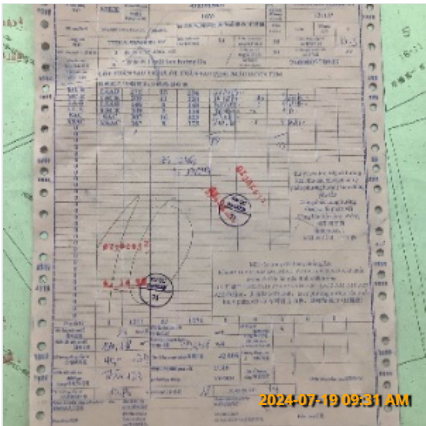

Spreading and Cutting

91. Is there a standardized process to verify marker against pattern, UA style number and cutting order prior to spreading and cutting? How is this validated (signed, stamp, etc.)?

Full Compliance

IMAGE Image 1

Spreading and Cutting

92. Does the Spreader separate rolls by dye lot during fabric inspection using keep records of rolls and dye lots?

Full Compliance

IMAGE Image 1

Spreading and Cutting

93. Is there a standardized process for inspection during spreading process?
Checks: ply height, spreading tension, edge and end alignment, shade, bowing, marker/fabric width, grain direction. Show records.

Full Compliance

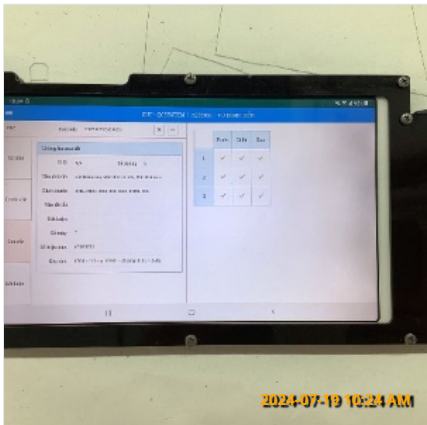

IMAGE Image 1

IMAGE Image 2

IMAGE Image 3

Spreading and Cutting

94. Is cutting accuracy checked using a hard pattern from Top, Middle and Bottom?

More Than One Area Out of Compliance

not use mica board

IMAGE Image 1

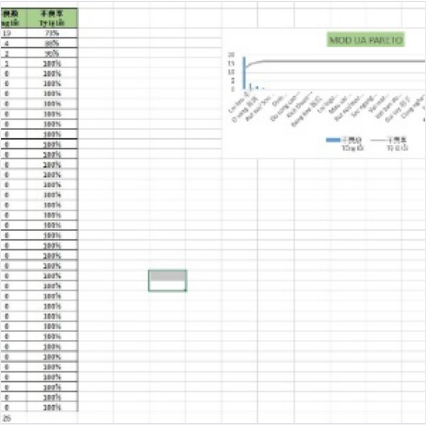

Spreading and Cutting	
95. Is cutting grain direction followed for die cutting?	N/A
Spreading and Cutting	
96. Is there a standardized process for panel re-cut and panel change at all processes level? (cutting, printing, embroidery, etc.)	Full Compliance
IMAGE Image 1	
	
Spreading and Cutting	
97. Is bundling and numbering separation done correctly following the spreading report?	N/A
Spreading and Cutting	
98. Are standards and visual management tools posted in local language?	Full Compliance
IMAGE Image 1	
	
Spreading and Cutting	
99. Are defect summaries and Pareto analysis conducted and shared with management?	Full Compliance

IMAGE Image 2

Sewing

100. Are color coded uniforms used to identify line leaders, QC/QA, Mechanics, Supervisors?

More Than One Area Out of Compliance

Worker not wear uniform

IMAGE Sewing 1

Sewing

101. There is a documented, standardized process for daily sewing machine cleaning. Including how to prevent/seek oil leaks

More Than One Area Out of Compliance

poor care the machine

IMAGE Image 1

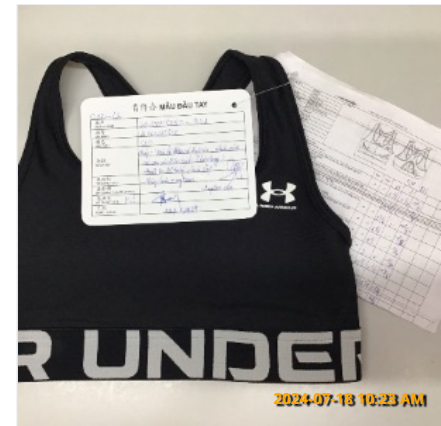

Sewing

102. There is a documented, standardized process to ensure there is an approved sample which is signed, dated, and confirmed for each style at each sewing line.

More Than One Area Out of Compliance

Missing QC checking and comment

IMAGE Image 1

Sewing

103. Is there a documented, standardized process for FPI (First Piece Inspection) according to UA requirement and which includes conformance to the Tech Pack, PP/ Reference Sample?

More Than One Area Out of Compliance

Missing Techpack update new season

Sewing

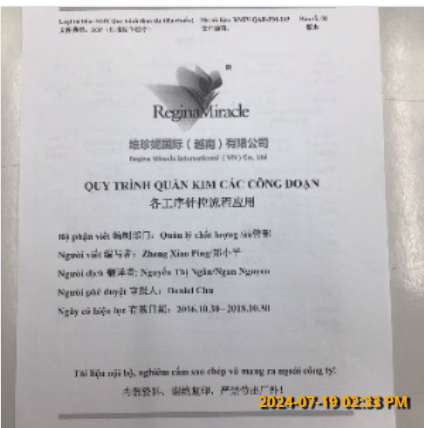

104. There is a documented, standardized process for preventative and corrective needle control? Is there a SOP for metal control policy (Scissors, clippers, tools, etc.) and how is this manage?

Full Compliance

IMAGE Image 1

IMAGE Image 2

Sewing

105. All sewing lines have visually established critical checkpoints where there is a documented standardized process to ensure RFT and PND (Right First Time and Pass-No-Defect) quality.

More Than One Area Out of Compliance

missing mock up

IMAGE Image 1

IMAGE Image 2

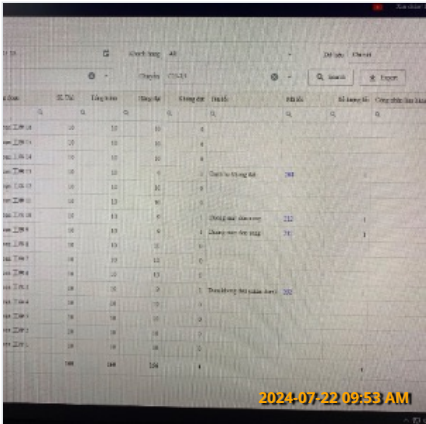

Sewing

106. There is a documented, standardized In-Line Inspection process by a roving QC with record keeping. (Defect type, quantity, machine, Operator Name and number.)

Full Compliance

IMAGE Image 1

Sewing

107. Is There a documented standardized In-Line Measurements process ensuring sewing allowance, using tolerances, calibrated measuring tapes and record keeping ?

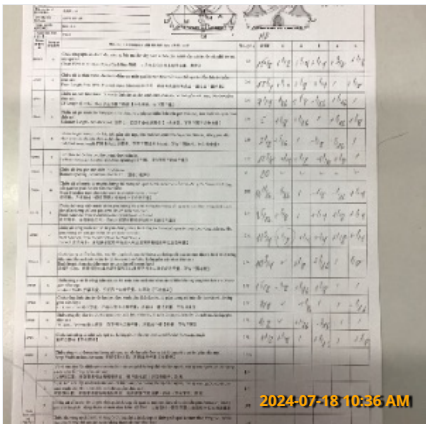

More Than One Area Out of Compliance

measurements tape broken

IMAGE Sewing 1

IMAGE Image 2

Sewing

1.5/20

Sewing

109. Does the fusing process have a documented, standardized process which includes periodic testing of temperature and bond strength with record keeping?

More Than One Area Out of Compliance

Not update on time

IMAGE Image 1

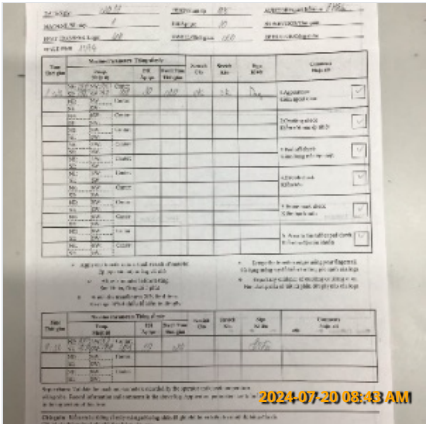

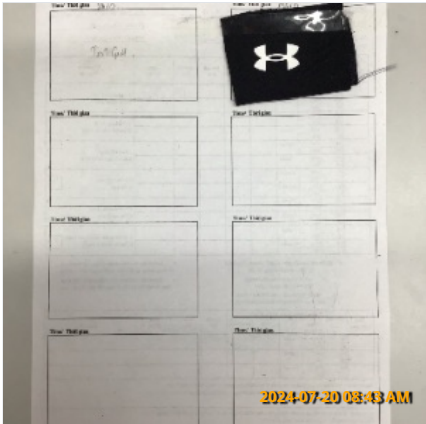

IMAGE Image 2

Sewing

110. Are controls in place & standardized process based on fabric types and style, identified, and documented according to the Development process? (Ex. Critical machines, folder, guides, etc.)

More Than One Area Out of Compliance

Not use guide for overlock machine

IMAGE Sewing 1

Sewing

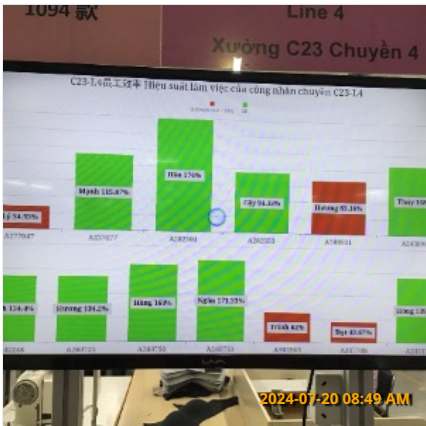

111. There are updated and accurate Hour by Hour or Bi-Hourly performance boards for each line including the following metrics: Quality, Efficiency, Defects, and Units per Labor Hour

Full Compliance

IMAGE Image 1

IMAGE Image 2

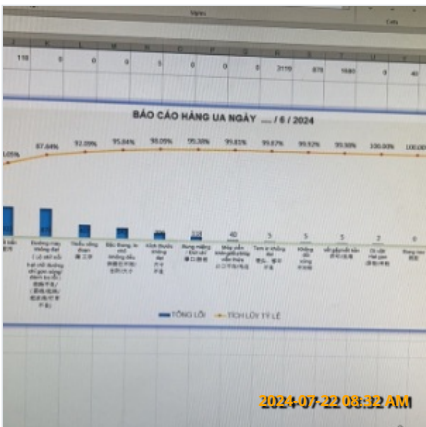

Sewing

112. Are defect summaries and Pareto analysis conducted and shared with management? How Often?

Full Compliance

IMAGE Image 1

End-of-Line Inspection

113. Inspection area has proper lighting, table height, and 5S practices

More Than One Area Out of Compliance

7S

IMAGE End-of-Line Inspection 1

End-of-Line Inspection

114. All finished products are 100% inspected

Full Compliance

End-of-Line Inspection

115. Product specifications and approved trim cards are available on the line for all running products

More Than One Area Out of Compliance

Still lacking some line

IMAGE Image 1

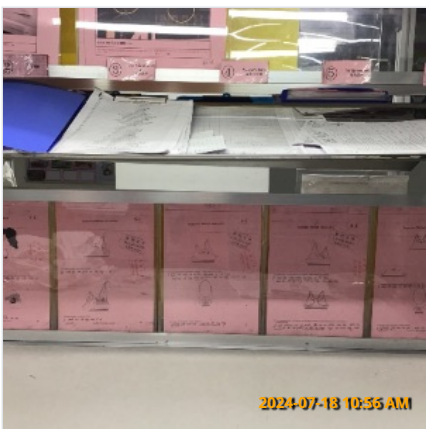

End-of-Line Inspection

116. Are all EOL (End-of-Line) inspectors following the Under Armour CFA (Certified Factory Auditor) Manual Inspection Process and having inspection records correct and updated? (Clockwise inspection, splaying seams, defect/QC inspector stickers.)

More Than One Area Out of Compliance

EOL overlock thread end defect.

IMAGE Image 1

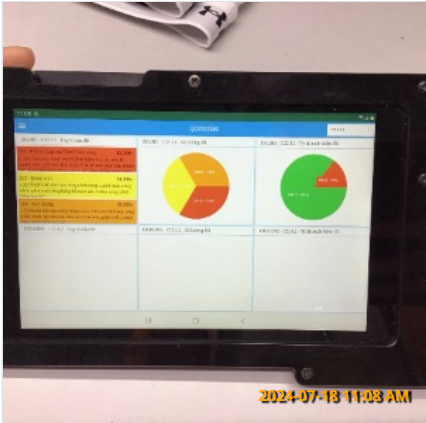

End-of-Line Inspection

117. All defects are properly identified and documented by defect type, including % of defects by hourly/bi-hourly checks?

Full Compliance

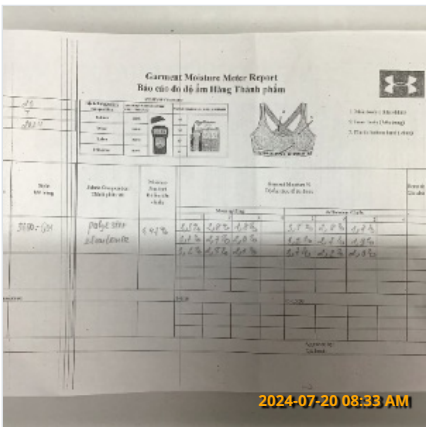

IMAGE Image 1

End-of-Line Inspection

118. Is there a procedure of moisture content check as per UA regulation?	Full Compliance
